

Hancock Department

ANTI RED FLAG DEMONSTRATION HERE SUNDAY

SONS' REUNION PLANS OUTLINED

Ishpeming Lodge Prepares for Reception of Visiting Members

Hundreds Expected to Attend the Exercises at Anthony's Grove

"Anti-Socialist Jubla,"

Copper country people should become familiar with this expression, which in English means "Anti-socialist picnic," for tomorrow it will be on the tongues of the Finnish residents of the district. Tomorrow anti-socialists will gather in this city for a great demonstration against the red flag and its unholders. It will be known as "Anti-Socialist" day and all interested are urged by those in charge to come to Hancock and participate.

The majority of the Finnish people of this district are not in favor of Socialism and for several months they have been working to dispel the impression that the Finns as a class are socialists. Members of every branch of the anti-socialist society will be represented tomorrow.

Elaborate arrangements have been made for the demonstration tomorrow and it is expected it will make history for the copper country. Some of the most prominent speakers and citizens of the copper country will give addresses. Senator W. Frank James of Hancock, and William J. Gallagher of Calumet, will be the principal speakers in the English language, while Rev. Rautanen, N. A. Lempen and K. H. Hama, will be the principal speakers in the Finnish language.

Parade to Anthony's Grove.

In the morning there will be a general reception to the clubs from the north and south ends of the district, special trains having been chartered to bring the visitors to Hancock. The festivities will commence at 1 o'clock in the afternoon when the delegates, attending, will meet in the North Star Temperance hall. From this meeting place a line of march will be formed and the procession will proceed to Anthony's grove near the car barns of the Houghton County Traction company.

Mayor Ojala of Hancock will act as chairman of the day and will open the meeting with addresses of welcome in both the Finnish and English languages. The reason for the demonstration will be explained by Hancock's chief official. An elaborate program will follow. Among the musical selections will be several numbers by the Calumet Glee club. The committee in charge yesterday secured the consent of this club to sing at the demonstration. The Imperial quartet of Hancock also will render several selections.

MARVIN TO RETURN JULY 7.

District Superintendent Marvin will return to the copper country from the southern peninsula July 7 to resume the work of preparing for Chautauqua week. It will be an extremely busy week for Methodists of the upper peninsula as a whole because of the three meetings that will take place. Hundreds of people from the iron district are expected to come for the Epworth league convention and the Ministerial association will have a representative from every town in the Houghton M. E. district.

BASEBALL GAMES POSTPONED

All baseball games scheduled in the Sunday School baseball league were postponed today, owing to the severe storm that swept over the copper country. The congregational and Painedale nines were to have played at the Hancock driving park and the Y. M. P. C. and S. P. L. club teams were to have played at Quincy.

ERUPTION LIKE RINGWORM ON FACE

Covered with Watery Blisters. Itched and Burned Terribly. Little Rest at Night. Cuticura Soap and Ointment Entirely Cured.

Lock Box 35, Maurice, Ia.—"In the spring of 1911 our little daughter, now five years, had a breaking out on her face and part of her neck that we took for ringworm. It resembled a large ringworm, only it differed in that it was covered with watery blisters that itched and burned terribly, made worse by her scratching it. Then the blisters would break through and let out a watery substance. She was very cross and fretful while she had it and had very little rest at night. When the eruption was at its worst the teacher of the school sent her home and would not allow her to attend until the disfigurement of her face was gone.

"We tried to kill it by applying but without result. It would seem to get better and then broke out again. I then wrote and received a sample of Cuticura Soap and Ointment. We washed the sore with the Cuticura Soap and applied the Cuticura Ointment and they gave instant relief, so we bought some more. It gradually grew better. We kept on using Cuticura Soap and Ointment and in three or four months the child was entirely cured." (Signed) Mr. Henry Fries, Oct. 22, 1912. Cuticura Soap 25c. and Cuticura Ointment 50c. are sold everywhere. Liberal sample of each mailed free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. T, Boston."

*Men who shave and shampoo with Cuticura Soap will find it best for skin and scalp.

BOARD'S JUNKET BRINGS RESULTS

Council Decides to Undertake Improvements Immediately

An extensive campaign for city improvements was mapped by the Hancock council last night when it was decided to build new sidewalks, place the alleys in a passable condition and give to the health officer power to make the municipality thoroughly sanitary. This plan came as a result of a recent junket of the council and heads of city departments which took them into every nook and corner of the four wards. The improvements will be undertaken immediately and in the event that the city's force is inadequate to complete the work, additional help will be secured.

An appropriation of \$265 for the Fourth of July celebration was authorized and the available sum of the demonstration amounts to \$1,000 through this action. Senator W. Frank James appeared on behalf of the soliciting committee and his appeal was extended the council to appear in the Fourth of July parade and to occupy seats on the rostrum during the exercises.

The board of review submitted the following report of assessed valuations: First ward, \$1,264,831; second, \$512,566; third, \$329,648; fourth, \$1,195,275.

A committee appointed to investigate a complaint of the Quincy Mining company relative to the assessments of its Lake Front and Kerdge theater ravine property was accepted, the statement recommending that the assessment of 1911 be levied.

Clerk Hoffenbacher was authorized to renew the city's membership in the Michigan League of Municipalities and the time for presentation of a copy of the city ordinances before being compiled was extended.

City Electrician Cuff reported that an expert engineer would come to Hancock today for the purpose of investigating the difficulty at the city's pumping station.

Alderman O'Neill recommended that a direct pipe line be laid between No. 1 pumping station and the reservoir and urged that the board of public works, city engineer and the fire and water committees be authorized to consider the advisability of the project. Under the present arrangement, the reservoir is filled through an indirect system and frequently, the supply is reduced to a minimum.

The board authorized the street commissioner to proceed with the work of improving the pavement on Quincy street. This improvement will begin Monday at the same time that the Houghton County Traction company begins its contract to repair a portion of the pavement. The city engineer submitted a report that he is prepared to proceed with the laying of macadam roads in East Hancock. The street commissioner also was directed to repair Elevation street.

Residents east of the city limits petitioned the council for city water service and the matter was referred to the board of public works. Just before adjournment, the council accepted an invitation to attend the Anti-Socialist demonstration tomorrow.

GEISMAR HOME FROM LANSING.

County Agriculturists Hopeful For State Potato Inspection.

Prof. Leo M. Geismar, who returned this week from Lansing where he attended a meeting of state agriculturists, is hopeful for the adoption of state inspection of seed potatoes. The meeting was called by Prof. Mumford, state leader, but almost all of the sessions were devoted to arguments for the proposed measure. Prof. Geismar led the discussions.

"This is the most important step in the agricultural development of Michigan," said Prof. Geismar yesterday, discussing the meeting. "It will tend to conserve the purity of the potato crop. If the state board does not provide the inspection we must try to have it brought about that the national department of agriculture shall do it."

"This is a time Michigan can take the lead in an important agricultural enterprise, instead of falling in behind after other states have taken the lead. Minnesota and Wisconsin are going to establish an inspection of seed potatoes, Maine and Virginia soils are so infected that the government threatens to quarantine their potatoes. It is a splendid chance for Michigan to insure the purity of her seed potatoes and to establish a very profitable market."

The new system adopted by the local management will be tried for the first time tomorrow. Every person purchasing a ticket at the gate will receive a tag and in this manner it is expected that many who refuse to pay their admission fee and sneak around to the back of the driving park, will be apprehended and forced to pay.

ELKS' CONVENTION CITY.

Grand Rapids Wins Out in Contest for the 1915 Meet.

At Petoskey, Grand Rapids won out in the fight for next year's Elks' state convention, although the Soo put up a good battle. Jackson made formal announcement it would be after the 1915 meet.

Shirley Stewart of Port Huron was unanimously chosen president. The contest for vice president resulted in the election of Charles Cartier of Ludington over Julius Ippel of Saginaw; second, S. C. Reilly of Chelsoygan; second vice president, Julius Ippel, Saginaw; third vice president, John Forward, third vice president, George Bostock, Jackson; secretary, George Bostock, Grand Rapids, re-elected; treasurer, Charles Mayworm, Ann Arbor, re-elected; Charles Chaplin, John Gibson, Port Huron, re-elected; sergeant-at-arm, Huron, Gilbert, Traverse City; door-keeper, William Hemmette, Saginaw; William William Hemmette, Saginaw; trustee, David Peter, Benton Harbor; life membership in state association, L. F. Williams, Detroit.

NEWS FORECAST OF THE COMING WEEK

Washington, D. C., June 27.—Unless the press of business renders his presence in Washington imperative President Wilson will go to Philadelphia at the end of the week to attend the big celebration of Independence Day in that city.

Monday is the day fixed for a special election to be held in the Third Alabama district to select a congressman to fill out the term of Henry D. Clayton, who recently resigned his seat in the House to accept a position on the Federal bench.

The provincial elections will be held in Ontario Monday. The contest is between the present Conservative administration of Sir James Whitney and the Liberal opposition led by Newton W. Rowell.

One of the most drastic prohibition laws ever adopted by any of the states will come into effect Wednesday in West Virginia. The law not only prohibits the manufacture, sale and importation of intoxicating liquors, but forbids the sale of any newspapers or periodicals containing liquor advertisements.

The much-discussed order issued by Secretary Daniels last April banishing all intoxicating liquors from the American navy will come into force Wednesday.

Marble House, the Newport home of Mrs. O. H. P. Belmont, is to be the scene Friday of a get-together meeting of the woman's suffrage leaders of the United States in an effort to concentrate support for a suffrage measure in Congress.

The centennial anniversary of the battle of Horseshoe Bend, in which Gen. Andrew Jackson broke the power of the Creek Indians and saved the great southwest from British domination, will be celebrated Saturday with exercises on the battlefield in Alabama. The governors and other officials representative of Alabama and the neighboring states will take part in the celebration.

The hundreds of Norwegian-Americans who have returned to the mother country this summer to attend the festivities in commemoration of the centenary of Norway's independence will hold a big celebration in Christiania Saturday in honor of the independence day of the United States. The feature of the celebration will be the unveiling of a bust of Lincoln, a gift to the Norwegian nation from Governor Hanna of North Dakota.

Thousands of school teachers from every corner of the country will begin to assemble in St. Paul at the end of the week in anticipation of the opening of the annual convention of the National Association. Other large gatherings of the week will include the international convention of the Baptist Young People's Union, in Kansas City; the international convention of the Epworth league, in Buffalo; the annual meeting of the Catholic Educational association, in Atlantic City, and the annual convention of the American Institute of Homeopathy, in Atlantic City.

Other events of the week of more or less public interest will include the Dominion Day celebrations throughout Canada, the consecration of Rev. M. J. Curley as Catholic bishop of St. Augustine, a charter election in Cincinnati, and the Royal Henley regatta and the British athletic championships, in both of which America will have representatives.

PRINCESS MARY TAKES UP GAME OF LAWN TENNIS.

Pastime is Now One of the Most Popular in England.

London, June 27.—Princess Mary, daughter of the King and Queen, has seriously taken up the game of lawn tennis, and is receiving lessons from Mrs. Lambert Chambers, the present lady champion. The game is now one of the most popular in the British Isles, having been given an immense impetus from the championship match played last year, when the Americans won the Davis Cup, and McCann won the Wimbledon. During the winter and spring new courts have been laid down all over the country, and the game is played at all the big house parties, while innumerable clubs, too, now have their tennis courts, and if not immediately, at any rate in the near future England hopes to produce young players to replace the veterans, who have to be depended upon to uphold her end in the game.

Other members of the royal family are devotees of the game. King George plays fairly well on the courts at Buckingham Palace and Windsor Castle, and is a frequent spectator at tournaments.

HANCOCK BREVITIES.

The Misses Lydia Kangas and Minnie Perttula of the Suomi college have gone east on a lecturing tour in the interest of the institution.

Mrs. N. S. MacDonald and children arrived yesterday from Detroit after a short visit with friends in this city left for Mohawk to join Dr. MacDonald.

Miss Laura Cusler is a guest at the home of Miss Florence Pinkney. The infant son of Mr. and Mrs. Frank Spehar of Coeur d'Alene died Thursday evening and burial took place yesterday.

GULF STREAM IS MIGHTY TORRENT

Admiral Pillsbury, U.S.N. Describes the Terrestrial Phenomenon

Washington, D. C., June 27.—Ninety billion tons of water are carried hourly through the Straits of Florida by the Gulf Stream, according to Admiral John E. Pillsbury, U. S. N., in a communication to the National Geographic Society, at Washington, D. C. This stream, he says, is probably the grandest and most mighty of any terrestrial phenomenon.

"If this one single hour's flow of water could be evaporated, the remaining salts would require many times more than all the ships in the world to carry it," says Admiral Pillsbury. "It is difficult for the mind to grasp the immensity of the great ocean river. When one is on board a vessel, floating upon its waters, one is not as much impressed at the power and grandeur of this wonder of nature as he is when he stands before a towering mountain, an immense iceberg, or a fall of water such as Niagara, but when one remembers that the mighty torrent, speeding on hour by hour and day by day in a volume equal to all the largest rivers of the world combined, carrying its beneficent heat to temper the climate of continents, one begins to realize that of all the forces of the physical world none can equal this one river of the ocean."

Influence on New World.

"It is interesting to note in the history of the Gulf Stream how great its influence has been on the fortunes of the New World. Before the discovery of America, strange winds and fruits were frequently found on the shores of Europe. Some of these were seen by Columbus and to him were convincing evidence that strange lands were to the westward. These winds were carried by the Gulf Stream and by the prevailing winds from America, so that in part, the stream is responsible for the discovery of the New World. Ponce de Leon, while searching for the Fountain of Youth, discovered this stream. He sailed southward along the coast of Florida thus stemming the current. He says they found a current that, though the wind was good, they could not stem. It seemed that their vessels were going fast through the water, but they were being driven back in spite of the strong and favorable wind. One ship was 'soon carried away by the current and lost from sight, although it was a clear sky.'"

Theories on Currents Numerous.

"The theories as to the cause of ocean currents have been many. In recent times the course of currents has been laid to rivers and the Gulf Stream chiefly to the Mississippi. In actual fact about 2,000 such rivers would be required. In the tropical regions there is a steady movement of the air from east to west known as the trade winds. Winds blowing over the surface of the water induce a current in the latter due to friction. At first it is only the merest skiff that moves, but gradually the motion is communicated from layer to layer until at last, if the wind is long continued as in the trade wind region, the movement extends to lower depths, 300 or 400 feet, or perhaps more. These trade wind currents continue across the Caribbean until they reach the obstruction of the Honduras and Yucatan coasts, from which they escape into the Gulf of Mexico."

Wind Also Is a Source.

"Another source of the Gulf Stream is the wave caused by the wind. Every ripple carries a certain amount of water in the direction toward which it is flowing, irrespective of the current caused by its friction, and when the waves become large, tons of water are hurled from the crest into the trough every time the wave breaks. In a large area like the Caribbean, having a comparatively constant wind blowing over its whole surface, this action is practically a simultaneous movement of the surface waters to the westward."

"There is every evidence that the Gulf stream is governed absolutely by law in all its variations; its course through the ocean is without doubt fixed; its fluctuations are by days, months, seasons, or by years, but they do not vary materially one year from the other. So we may conclude that of all the physical forces on this earth that are subject to any variations at all the great ocean currents are most immutable."

BALBOA AND CRISTOBAL REGULAR PORTS OF CALL.

Several Steamship Lines Now Transferring Cargoes There.

Panama, June 27.—The canal terminals at Balboa and Cristobal have now become regular ports of call for several steamship lines. Interruption of the Tehuantepec railway route across southern Mexico drove considerable shipping to these ports, but even now, with the Tehuantepec service re-established there are many boats which continue to call at Balboa or Cristobal for transfer of cargo across the isthmus. The American-Hawaiian Steamship company has gone back to the Mexican ports, but only until the canal is ready for regular use. The Elder & Frye company, however, which has hitherto had only an occasional service between Liverpool and Cristobal has now increased its service and is running regular steamships, and a Norwegian line of tramp steamers call regularly, while on the west coast the Salvadorian Railway Steamship Line has been diverted from Mexican ports to Balboa.

It is understood also that steamers of a new Japanese line will begin service to Balboa soon.

LOST STEAMER IS FOUND.

Batavia, June 27.—The British steamer Kintuck, overdue yesterday, has been found. The steamer was driven ashore in the straits of Sunda between Java and Sumatra by heavy seas, caused by a submarine disturbance. It was crowded with native emigrants.

DEMOCRATS WOULD PUT BUSINESS IN "JACKET"

BORAH, FOR REPUBLICANS, BEGINS ATTACK ON TRADE COMMISSION BILL.

Washington, June 27.—Republican attack on the federal trade commission bill was opened in the Senate last night by Senator Borah, who told his colleagues that passage of the measure would lead not to certainty among business men as to what they might lawfully do, but to another period of uncertainty such as followed the enactment of the Sherman anti-trust act.

Senator Borah criticized particularly the provision in the bill which says that "unfair competition" is unlawful. He declared that leading lawyers in the Senate were unable to agree on what the term means and insisted it was unjust to ask the businessmen of the country to determine a matter when the national legislators have failed to understand it.

"You are putting business in a straightjacket," said Senator Borah. "You should define what shall constitute unfair competition."

Senator Newlands urged that it would be almost impossible to define practices that constitute unfair competition and Senator Lewis said that if such definitions were put in the bill practices not named could be included in which were admittedly unfair but which would not be unlawful because not specifically mentioned.

Whittemore's Shoe Polishes
FINEST QUALITY LARGEST VARIETY

QUICK WHITE
MAKES DIRTY CANVAS SHOES CLEAN WHITE

SOFTENS PRESERVES LEATHERS COLOR LUSTRE

"QUICK WHITE" the only "ladies" shoe dressing that polishes and cleans all kinds of shoes, including leather, rubber, and canvas shoes, without rubbing. "FRENCH GLOSS," 10c.
